'Dear Children

The spine-chilling murder of a young girl recently has sent shock waves across the country and the need of the hour is to help and guide the parents as well as the youngsters to adapt to the new world and learn new technologies to prevent violence. It is extremely important that the families lay down certain rules where the parents are aware of the company that their children keep so that they can protect them from unsafe places and people. The children should too share good and bad things that happen to them openly with their parents. The kids must remember that their parents love them and will always be ready to make sacrifices for their well-being. That means that the children have an even greater responsibility to listen to their parents, respect them, be grateful and love them back.

Remember kids, your parents have lived longer than you, and have learned their fair share of lessons. Most importantly they know you very well, probably more than you think. You might feel that they expect plenty of things out of you but what you don't realize is that what they demand from you is always going to be in your best interest, even if you can't understand it at the time.

Life will go a lot easier for you and your parents if you trust them and share everything with them. The problems start arising when you think you are more knowledgeable than your parents. You might know many things that they don't, but experience and wisdom of years certainly make your parents more aware and in touch with the ground realities. So, learn from the gruesome incidences happenings around you and confide in your parents. Trust them more than anyone else. Have faith in them and life will become much safer and more beautiful.

क्यों????

क्यों आज एक बार फिर मन में बहुत सारे प्रश्न उठे हैं।

क्यों एक बार फिर हम आदिमानव होने को चले?

क्यों छोड़ कर वस्त्र, निर्वस्त्र होने को चले?

क्यों मनुष्य स्वार्थी होकर दूसरों को गिराता?

क्यों मनुष्य अपनी बुराइयों को है छुपाता?

क्यों सुख साधनों की होड़ में खो रहे हैं हम चैन ?

क्यों पाकर सब कुछ भी जी रहे हैं, जिंदगी बेचैन ?

क्यों आतंकवाद से सारी दुनिया में मचा हाहाकार?

क्यों राजनीति नित जनता को परोस रही भ्रष्टाचार?

क्यों प्रदूषण की समस्या से जूझ रहा हर देश ?

क्यों धूमिल सा हो गया स्वच्छ पर्यावरण का परिवेश?

क्यों सभ्यता और मर्यादा आई पतन के कगार पर?

क्यों अस्तित्व मानवता का आया जैसे सागर की मझधार?

क्यों मनुष्य कन्या भ्रूण की हत्या कर रहा समय से पहले?

क्यों अपने विनाश पर तुला है मानव प्रलय से पहले?

क्यों महँगाई से हो रहा है आम आदमी तार-तार ?

क्यों आज सज्जनों का हो रहा है तिरस्कार?

क्यों देश में फैली है असहिष्णुता अपार?

क्यों हो रहा एकता पर दंगों का प्रहार ?

क्यों शिष्य कर रहा है शिक्षक का अपमान?

क्यों चुप बैठी है जनता नादान?

क्यों संसार में भर गया है लालच से मानव का मन?

क्यों घुट- घुट कर जी रहा है सत्य ?

क्यों बन रहा मानव एक दैत्य ?

क्यों हम इतना क्रूर होने को चले हैं?

क्यों हम मानव से आदिमानव होने को चले है?

## Animals and Us

Animals are the most beautiful creation of God. They brighten up our lives with their grace. They teach us the power of unconditional love. They make our world a better place. Unlike humans animals do not have any greed and are always content. They protect the environment rather than destroying it like we do. They protect us also but we hurt them. They are loyal and faithful to us. We people ruin the lives of animals.

Thank You

## Cleaner Oceans, Better Life

Oceans are those that share a part in containing the lifeline of all creatures, big and small: water. And without water, without the resources accommodating water, we are nothing. Even if no one pays attention, the ocean is all a fish knows. It is its life. And to save this life, we need clean oceans. Oceans are not our dustbins. They are not something to be taken lightly. The waste we dump into our oceans is not something to be taken lightly. Though we may not realize it, the waste we let fall, even on the shores, that waste gets carried away by waves to faraway places humans are yet to visit. An estimated 199 million tones of refuse are still in the oceans and God knows how much more we'll unearth. This is, not surprisingly, all our fault. It is a result of whenever we are 'cleaning our homes'. Most of the waste we clear is non-biodegradable, which means that the next few generations will have proof of what we did and what wonderful people we were. And if we're searching for another reason to clean our water bodies, think of this: these bodies are the source of someone's livelihood. If the oceans aren't clean, how can you expect fish to survive? How can you expect the common man to earn his living? So here's what we must do, and do now: clean your surroundings, stop displacing waste from your home to the oceans. Think of the marine creatures, and the life of peace we are robbing from the them. Think of fishermen and how they'd earn if all the fish swam to clearer waters. And most importantly, think of Mother Earth.
